EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science, GPA: 3.92

Aug. 2023 – May 2027

Relevant Coursework: Artificial Intelligence, Large Language Models, Data Structures and Algorithms, Efficient Algorithms, Computer Architecture, Linear Algebra, Probability, SQL and Database Systems

Optiver FutureFocus: Tech Track – 2026

EXPERIENCE

Gemini

Sept. 2026 - Dec 2026

Software Engineering Intern

New York, NY

- Incoming on Machine Learning Predictions Team

Slack

May. 2026 – Aug. 2026

Software Engineering Intern - ML

San Francisco, CA

- Architected **Block Kit Builder AI**, a GenAI natural-language-to-UI engine cutting build time **10x** for 3 tiers
- Built **LLM inference pipeline** on Haiku 3.5 with prompt guardrails and self-healing retries; **98%** valid JSON
- Scaled POC to prod over **3 launch phases**, onboarding **50+** external devs; **HITL** feedback auto-tunes context

Amazon

Aug. 2025 – Dec. 2025

Robotics Software Intern

Remote

- Improved warehouse robot navigation accuracy **12%** by optimizing a **ROS2** LIDAR point-cloud pipeline in **C++**
- Enhanced motion planning efficiency **15%** by implementing **A*** and RRT planners in ROS2, tuning cost heuristics
- Cut detection latency **30%** by offloading an **OpenCV/CUDA** perception pipeline to GPU for real-time inference

Slack

May 2025 – Aug 2025

Software Engineering Intern

San Francisco, CA

- Developed an Incident Bot for real-time discrepancy detection using Grafana and **Python** utilizing Slack API
- Achieved reliability in auto-channel creation and SME paging via PagerDuty and webhook handlers
- Authored **2 API endpoints** handling Grafana payloads, triggering Slack channel creation and IC paging

Texas A&M Department of Computer Science

Jan. 2025 – Present

Software Engineer

College Station, TX

- Developed **Objective-C** iOS and **JavaScript** web features for campus-wide Howdy portal serving **74K+** students
- Built **RevBot**, a **RAG** chatbot over an AWS **S3** data lake, deflecting 40% of repeat support requests
- Cut S3 log retrieval latency **30%** by redesigning query paths with **Athena SQL**, DynamoDB indexes, and caching

Oracle

May 2024 – Aug 2024

Software Engineering Intern

Dallas, TX

- Built a **Python ETL** script cleaning **95K+** support cases, unlocking 90% of new data for downstream analysis
- Automated **SPARC** server stress testing in **Python**, cutting manual QA cycles 60% and surfacing regressions
- Shipped a **Streamlit** dashboard on **Python** and 2 REST APIs, serving 3 self-serve customer analytics use cases

PROJECTS & LEADERSHIP

InfraPilot | *Agentic AI, LLMs, RAG, LangGraph, Python*

Jan. 2026 – Present

- Built an **Agentic AI** debugging assistant to triage **50+** CI failures and generate PR-ready fixes
- Integrated **LangGraph**, **GitHub API**, vector search, shell tools, and test runners for tool use
- Reached **78%** task success with an **evaluation harness** tracking tests, latency, and regressions

TECHNICAL SKILLS

Languages: Python, C++, Java, Objective-C, Swift, Go, PostgreSQL, SQL

AI/ML: LLMs, Agentic AI, RAG, Prompt Engineering, Vector DBs, PyTorch, ONNX, TensorFlow

Frameworks/Tools: LangGraph, LangChain, Git, Docker, FastAPI, Streamlit, TravisCI, GCP, AWS S3, Athena

Libraries: Pandas, NumPy, Matplotlib, OpenCV, SK-Learn, Beautiful Soup, Scrapy

Extracurriculars: Content Creator on YouTube, TikTok, and LinkedIn with **2.8M+** views across **30** videos
